Good News! GoBrolly® is the Internet you have always wanted: “It Just Works”

GoBrolly®’s Network Management Practices:

- GoBrolly® does not block content of any kind *unless* it is found to be illegal by a competent legal authority. (There are some rules, you know.) However, we reserve the right to restrict and / or block as we see fit, without prior notice.
- GoBrolly® does not “Throttle,” or “Slow Down” your connection.
- GoBrolly® does not have any “Data Caps” or data limitations.
 - The data you can receive is limitless, just not free.
- GoBrolly® does not have any “Priority” network management.
 - But we might if it would give you, our Customer, a better Internet experience.
- GoBrolly® does not have any “Paid Fast Lanes.”
 - But we might if it would give you, our Customer, a better Internet experience.
- GoBrolly® manages to peak Internet performance, not “average,” not “minimal,” but *peak*. To eliminate, as much as possible, any congestion or contention.
 - *What does that mean for our Customers?* Your connection will run at its rated speed whenever you need to use it. We are trying to optimize our Customer’s Internet experience; we are not trying to optimize our network.

GoBrolly® reserves the right to modify this statement at any time, without notice, and these statements may change due to our determination of Reasonable Network Management practices.
